NOTES/AMENDMENTS/NEWS

Our new catalogue numbers aligns this paper copy of our price list with a soon to be live New Website. The new web based catalogue requires this addition to enable you to shop online. As we restock, the new numbers will start to appear on our packaging. Fortunately we humans can work with either system, but the computer requires the extra numbers in the sequence!

We are also working on a general upgrading of many items, of replacing whitmetal components with brass or nickel silver as stocks run low. You, our customers consistently tell us this is what you prefer. Along with this a number of new items are coming "on stream" and as always we are interested to hear your suggestions for additions to the range.
